EMPLOYMENT HISTORY

Visual Designer at Xceleration, Charlotte, NC

February 2019 – Present

- Designed and developed custom client-facing WordPress themes using HTML5, CSS3, and PHP. I developed the themes to include support for widgets and custom post types to make it easily editable for non-developers from the WordPress admin.
- During a tight-deadline rebrand of a child company, I worked closely with the creative team and senior leadership to effectively rebrand the company's internal and external identity.
- Designed user-focused web components and websites through the design process of research, wire-frames, mock-ups, and prototypes to facilitate efficient revisions and ensure project scope is maintained.
- Worked alongside the creative team and senior leadership to design a Shopify website for a child company that was in line with the company brand and supported the long term company vision. I developed custom HTML and CSS UI components in conjunction with the Shopify theme builder.
- Designed and developed custom email templates for clients using HTML, CSS, and Sketch.
- Utilized Google Analytics and Google Data Studio to effectively display user data from internal applications on a custom report.
- Engaged in market research, competitor research, and keyword research to create an SEO strategy that would improve our onsite and offsite SEO.

Lead Web Designer & Digital Marketing Specialist at Unconditional Media, Charlotte, NC

August 2017 – February 2019

- Implemented highly targeted PPC campaigns for clients with limited budgets to increase site traffic from their target audience while maintaining strict budget requirements.
- Analyzed website performance and implemented WPO and CRO strategies to increase onsite conversion rates.
- Orchestrated training for new ad specialists to streamline the hiring process and onboard new employees efficiently and effectively.
- Lead and mentored junior PPC specialists to facilitate both their career growth and company growth.
- Managed website and marketing projects to ensure project scope was maintained and all objectives were delivered.
- Communicated carefully with clients to understand their business goals, determine project objectives, and resolve concerns.

Front End Web Developer at Carolina Auto Image, Charlotte, NC

June 2016 – Present

- Designed and developed a mobile-responsive website that resulted in a 100% increase in site traffic over the course of a year.
- Designed and developed a static website using HTML, CSS, and JS to increase website traffic and the number of leads gained through the website.
- Used Azure Cloud Services to host the website to ensure quick load times and reasonable monthly costs.
- Redesigned the website in WordPress for ease of editing using their CMS.

- Provided ongoing support and maintenance to ensure client satisfaction and avoid website downtime.
- Analyzed the website traffic using Google Analytics and provided monthly performance reports to show potential opportunities for growth and places we can work to optimize.
